infra-docs Documentation

Release 1.0

Nigel Babu

This website is meant to serve as the source of truth about gluster project's infrastructure. It describes our tools and general operational procedures.

Tools

We maintain several tools for the project. This section describes our tools and any quirks in our setup. The detailed configuration for each tool can be found in our Ansible or Salt repository.

1.1 Gerrit

We use Gerrit as the primary place for hosting code and conducting code reviews. It is hosted on formicary.gluster.org in the RDU.

- URL: https://review.gluster.org

- Current Version: 2.12.2

- Date of Upgrade: 01-06-2016

1.1.1 Plugins

We have the following plugins installed on our instance:

#todo: Add links to plugin #todo: Add proper todos

- Github (only the oauth library, not the plugin).

- Event log.

- Replication.

1.1.2 Replication

Two repositories from our instance are replicated onto Github

- glusterfs

- libafr

Procedures

This document is meant to serve as a guide for our standard procedures in case of emergencies, errors, upgrades, or other maintenance tasks.

Indices and tables

- genindex
- modindex
- search
